Story blog post – PITCH Part 1: description of chosen project and motivation*

This text must summarise the heart of your research: the project, decision taken, data found, research objective. The maximum character limit (spaces included) for this section is **800 keystrokes**.

Neste post mostramos algumas das perguntas que fizemos à Plansel, acompanhadas das respetivas respostas que nos foram dadas. Pretendemos com o mesmo esclarecer o publico e perceber como se procede na produção de vinho!

Na visita à fábrica da Plansel colocamos as questões já mencionadas e obtemos em primeira mão as suas respostas.

Story blog post – PITCH Part 2: description of significant phases of the research*

This text must summarise the discoveries made: refer to text on your blog, the most significant stages of interviews, the key points of your investigations. The maximum character limit (spaces included) for this section is **800 keystrokes**.

A fermentação do vinho geralmente leva cerca de 30 dias. As pipas, com capacidade para 250 litros, podem ser reutilizadas 2 a 3 vezes. O nome “Plansel” refere-se a plantas seleccionadas, relacionado ao antigo foco da empresa em produzir plantas para vinhas.

Story blog post – PITCH Part 3: proposals and follow-up*

This text has to summarise your proposals for continuing to follow the project and how you intend to continue to monitor it. The maximum character limit (spaces included) for this section is **800 keystrokes**.

Pretendemos continuar o projeto incentivando ao consumo de produtos europeus por parte das populações, através de mecanismos e ideias que apresentem os benefícios de consumir aquilo que é local ou regional.

Para outro lado pensamos continuar a visitar e publicitar a Plancel de forma que a sua atividade e história chegue a mais pessoas.

Para realizarmos todos estes planos iremos encontrar-nos com regularidade, com indicação do professor.

FINAL CREATIVE WORK*
